Profile

Backend-focused Full-Stack Developer with hands-on experience designing, deploying, and maintaining production-ready web applications and database architectures. Proficient in the MERN stack, specialized in secure API design, complex data pipelines, and clear technical documentation. Recognized for operational reliability, systematic problem-solving, and bridging the gap between technical infrastructure and organizational needs.

Technical Skills

Technical Skills

- **Backend & Databases:** Node.js, Express, PostgreSQL, MongoDB, (Schema Design, Mongoose, Aggregation Pipelines), RESTful API Architecture.
 - **Security & Operations:** JWT Auth, Google Auth, Middleware Development, Git/GitHub, Environment Security, Postman/Bruno API Documentation.
 - **Frontend Tools:** JavaScript (ES6+), TypeScript, React, Tailwind CSS, HTML5, CSS3, Responsive Design, Vercel & Netlify Deployment.
 - **Design & Workflow:** Figma (UI Reference & Handoff), Markdown Documentation.
-

Technical Projects

DevNotes API (Backend Architecture)

- Engineered and deployed a production-grade backend service utilizing Node.js, Express, and MongoDB.

- Implemented secure token-based authentication via JWT, alongside robust data models and custom validation middleware.
- Optimized data retrieval systems using advanced database queries, query piping, and aggregation pipelines.
- Authored comprehensive, corporate-grade API documentation ensuring seamless frontend consumption and clear integration guidelines.

Greenpeace OVC1110 NGO Website & Infrastructure

- Architected and deployed the public-facing web infrastructure to support operational transparency, reporting, and fundraising efforts.
- Translated non-technical organizational mandates into high-performance web features, collaborating closely with administrative stakeholders.
- Maintained code quality, optimized asset delivery, and handled continuous updates to ensure maximum system uptime.
- *Tools used:* React, Tailwind CSS, JavaScript, Vercel.
- <https://www.greenpeaceovc1110.org/>

Tallman Logistics Platform

- Developed a responsive web platform to streamline digital presence and improve conversion rates for client inbound requests.
- Built highly scannable layouts and intuitive user pathways to maximize business credibility and presentation.
- *Tools used:* HTML, CSS, React, Zoho Integration.

Professional Experience

Digital Operations & Technical Assistant — *Greenpeace OVC1110*

- Managed day-to-day digital infrastructure, data organization, and reporting workflows for internal coordination.
- Led the transition from unstructured records to standardized digital reporting files for program tracking.
- Oversaw the maintenance and technical roadmap of the organization's web applications.

Education & Certifications

- **Fullstack JavaScript Program** — TechStudio Academy (2025)
 - **B.A. Islamic Studies (Distinction)** — Crescent University (2024)
-
